

No Installation  
Place ReverseAlarm™  
on your back up light  
**ReverseAlarm™**  
We believe in safety first

No Installation  
required.  
Waterproof.

Approximately  
50Hours  
of Alarm Usage

When in reverse  
a **LOUD BEEP** will alert anyone  
near or around your vehicle

For your Auto,  
Suv, Van or Truck  
**ReverseAlarm™**

All vehicles have two back-up lights and there usually have a clear or white plastic covering. When you are backing-up, the ReverseAlarm™ sounds a "beeping" alarm to warn pedestrians, especially for child and old person that your car, SUV, or truck is in reverse. Simply attach to one of your back-up lights for greater safety and peace of mind. Easy to use and install, it requires no tools.

1 Clean and dry the plastic covering of the back-up light.

2 Peel off the 3M adhesive tape at the back of ReverseAlarm™.

3 Lock the small hole on the back of ReverseAlarm™ carefully. Need to vertically aim at the back-up light in order to make more lights across the small hole and then trigger the ReverseAlarm™ to make the sound. The whole ReverseAlarm™ must be stick with back up light's bulb covering very well.

**CAUTION:**

This product is intended to be used in conjunction with standard vehicle and personal cautionary signals solely as a means of alerting pedestrians and drivers of other vehicles that your vehicle is moving in reverse. The use of this product is not intended to replace your responsibility as a driver to comply with standard safety driving precautions as regards driving a vehicle in reverse.
